

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Evli Short Corporate Bond

Legal entity identifier: 743700SXX2ZOCK35W726

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective**: ____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: ____%

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 4.8% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund has promoted environmental and social characteristics by following Evli's Principles for Responsible Investment, Climate Change Principles and climate targets, and by requiring that target companies follow good governance practices. The fund has used the means described below to implement the environmental and social characteristics it promotes:

ESG integration: The fund's target companies have been analyzed before making an investment decision and during the investment period with regard to environmental, social, and corporate governance matters (ESG factors). The analysis is based on Evli's internal database, which is based on data from external data providers. Evli has developed ESG integration by updating its responsible investment principles and developing ESG tools for portfolio management during the year.

Exclusion by industry: The fund has excluded harmful industries on the basis of Evli's responsibility principles and Climate Change Principles. In addition, the target companies have been monitored regularly for violations of the principles defined in the UN Global Compact, the UN Guiding Principles on Business and Human Rights and the OECD Principles for Multinational Enterprises. On the basis of regular monitoring, Evli's Responsible Investment Team will take the necessary measures with respect to companies that are suspected of having violated the above-mentioned international principles. Such companies can either be excluded directly or Evli can engage with them. If dialogue with a company fails or is deemed to be unhelpful, the company may be added to the exclusion list.

Climate change mitigation: Evli's goal is to achieve carbon neutrality by 2050 at the latest, and it has set an interim target of a 50 percent reduction in indirect emissions from all investments by 2030, provided that the investment environment allows for it. The comparison year is 2019. The fund-specific share of the emission reduction target may vary between funds. During the year, Evli reinforced its climate commitment by signing the Net Zero Asset Managers (NZAM) initiative. Work on climate objectives continued by creating a snapshot, developing climate risk management and with engagement, and the Climate Working Group focused on identifying best practices and building on them to develop clear next steps for 2023. The climate targets, together with the Climate Change Principles, provide a systematic approach to taking climate change into account in investments.

Active ownership and engagement: During the year, Evli exercised active ownership by engaging with a total of 22 companies, including one company in the fund. In addition, Evli participated in the following investor initiatives: Climate Action 100+, investor letters coordinated by CDP, and engagement through CDP, the purpose of which is to encourage companies to set Science-Based Targets. In the area of human rights, Evli joined the PRI Advance initiative, under which investors take joint action on human rights and social issues. Together with other investors, Evli also signed the Global Investor Statement to Governments on the Climate Crisis, a letter to governments encouraging them to ensure that the global temperature increase will be limited to 1.5 degrees Celsius, take early action to keep greenhouse gas emissions in line with the 2030 target, promote non-carbon emission reductions, increase the supply of climate finance and strengthen climate reporting across the financial system with mandatory TCFD reporting, requiring science-based climate transition plans, and coordinating and promoting coherence in global regulation in the financial sector. In addition, Evli signed a global COP15 initiative with other investors at the UN Biodiversity Conference (COP15), calling on governments to take coordinated action to combat climate change and biodiversity loss around the world, to set a stronger mandate for financial institutions to align financial activities with biodiversity targets, and to adopt an ambitious Global Biodiversity Framework at COP15 in Montreal.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Indicator name	Value	Additional information
Companies without serious norm violations	100.0%	Coverage: 94.68%
Share of companies with Paris aligned climate targets	58.6%	Coverage: 84.36%
WACI (Scope 1+2 tCO2e / \$M sales) of current portfolio constituents		
2022 emissions data	196.9	Coverage: 79.79%
2021 emissions data	248.7	Coverage: 70.38%
2020 emissions data	194	Coverage: 59.78%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The fund's goal is to promote climate change mitigation by investing at least 2 percent of its total investments in activities that are environmentally sustainable economic activities under the EU taxonomy system (EU Taxonomy Regulation). The EU Taxonomy Regulation sets criteria for economic activity that is considered to promote the environmental objectives of the regulation. The Fund invested a total of 4.8 percent in economic activities that contribute to climate change mitigation. More detailed information on EU taxonomy-aligned investments can be found later in the report.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

The fund does not make sustainable investments that would cause significant harm to other environmental or social objectives. The fund has made sustainable investments that are aligned with the EU Taxonomy Regulation. The EU Taxonomy Regulation establishes criteria for when an economic activity promotes the environmental objectives referred to in the regulation, one of which is that an activity must not cause significant harm to other environmental objectives. The fund also complies with Evli's Principles for Responsible Investment and Climate Change Principles. Moreover, a company that violates the principles of the UN Global Compact, the UN Guiding Principles on Business and Human Rights or the OECD's Guidelines for Multinational Enterprises can be excluded from investment by the Responsible Investment Team. The fund also takes into account the principal adverse impacts on sustainability factors.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

- The principal adverse impacts (PAI indicators) on sustainability factors have been taken into account in accordance with Evli's Principles for Responsible Investment and Climate Change Principles. The PAI indicators are considered through an internal process based on Evli's Principles for Responsible Investment. An internal PAI tool has been built based on data from an external service provider to view PAI indicators relevant to the investment target. Evli's Principles for Responsible Investment are asset class-specific and cover all Evli funds. Evli's Principles for Responsible Investment and Climate Change Principles define industry-specific exclusion limits and the process for dealing with any identified norm violations.
- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

The consideration of PAI indicators also covers the OECD Guidelines for Multinational Enterprises. Evli regularly monitors its active investments and seeks to influence the companies' practices. Evli's Principles for Responsible Investment define the basic standards for norm-based screening and exclusion of companies. If a company violates the principles of the UN Global Compact, the UN Guiding Principles on Business and Human Rights or the OECD Guidelines for Multinational Enterprises, Evli will either seek to influence the company's actions or exclude it from its investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Evli has taken account of the principal adverse impacts of its investments on sustainability factors (Principal Adverse Impact or PAI indicators) in accordance with Evli's Principles for Responsible Investment and its Climate Change Principles. The PAI indicators have been considered through an internal process based on Evli's Principles for Responsible Investment. An internal PAI tool has been built based on data from an external service provider to view PAI indicators relevant to the investment target. Evli's Principles for Responsible Investment are asset class-specific and cover all Evli funds. Evli's Principles for Responsible Investment and Climate Change Principles define industry-specific exclusion limits and the process for dealing with any identified norm violations.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2022

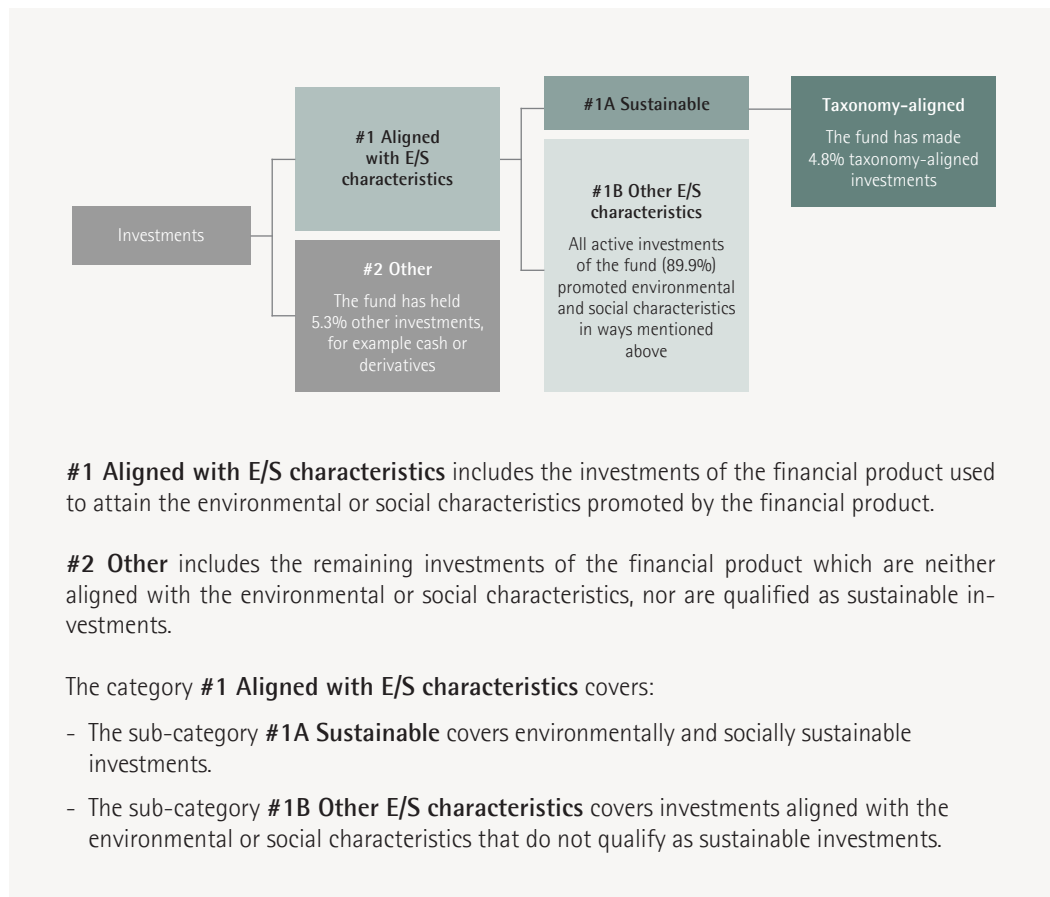

Largest investments	Sector	% Assets	Country
Citycon Treasury 1.10.2024 2.5% Callable	Real Estate	1.77%	Netherlands
Sato-Oyj 31.5.2024 1.375% Callable Fixed	Real Estate	1.75%	Finland
Societe Generale 27.2.2025 2.625% At Maturity Fixed	Banking	1.73%	France
Santander Issuan 4.4.2026 3.25%	Banking	1.72%	Spain
Ferrari Nv 27.5.2025 1.5% At Maturity Fixed	Automotive	1.65%	Netherlands
Nokia Oyj 11.3.2026 2% Callable Fixed	Technology & Electronics	1.51%	Finland
Deutsche Bank Ag 19.5.2026 4.5% At Maturity Fixed	Banking	1.46%	Germany
Bnp Paribas 27.1.2026 2.75% At Maturity Fixed	Banking	1.43%	France
Hsbc Holdings 30.6.2025 3% At Maturity Fixed	Banking	1.43%	United Kingdom

Zf Finance 21.9.2025 3% Callable Fixed	Automotive	1.34%	Germany
Intl Consolidat 4.7.2023 0.5% Callable Fixed	Transportation	1.34%	Spain
Commerzbank Ag 23.3.2026 4% At Maturity Fixed	Banking	1.31%	Germany
Bewi Asa 3.9.2026 2.601% Callable Floating	Basic Industry	1.28%	Norway
Finnair Senior Unsecured Fixed Rate Notes	Transportation	1.25%	Finland

What was the proportion of sustainability-related investments?

● What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emission and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

In which economic sectors were the investments made?

Sector	% Assets
Banking	15.2%
Financial Services	10.5%
Automotive	12.0%
Basic Industry	3.3%
Capital Goods	9.0%
Consumer Goods	1.8%
Healthcare	0.9%
Media	2.1%
Transportation	9.3%
Real Estate	11.1%
Retail	0.4%
Services	5.3%
Telecommunications	3.1%
Technology & Electronics	4.7%
Utility	6.1%
Sectors and sub-sectors that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	1.01%

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund has made investments associated with climate change mitigation or adaptation to climate change that are EU taxonomy-aligned as set out below. Other investments that promote environmental factors are not sustainable investments under the Taxonomy Regulation.

The proportion of taxonomy-aligned investments is expressed as a share of turnover. The proportion of taxonomy-aligned investments is based on data provided by an external data provider and not verified by a third party.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

The fund has made 4.8% taxonomy-aligned investments. This share includes possible investments to transitional and enabling activities.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The Principles for Responsible Investment, the Climate Change Principles and the exclusion principles apply to all direct investments made by the fund. The fund's other investments can for example be for hedging or liquidity purposes. The fund may also have invested in derivatives contracts both for hedging purposes and within the fund's investment strategy, and it may have held cash. Such investments are not subject to the ESG requirements or minimum safeguards described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Evli Short Corporate Bond has promoted environmental and social characteristics and has focused especially on the comprehensive assessment of target companies' sustainability and has avoided investing in companies that have problems with sustainability. In addition to the current state of sustainability factors, the analysis focused on the direction of development, the targets set by the companies and the plausibility of the development plans. Active and continuous sustainability monitoring and the ability to react to any emerging sustainability problems are crucial in portfolio management.

The fund has engaged with some of its the target companies during the review period as part of the promotion of environmental and social characteristics. The aim of the engagement has been to accelerate the development of sustainability factors in the target companies' operations and to encourage the companies to establish science-based emission reduction targets.
