EVLI IN BRIEF

"We see wealth as an engine to drive sustainable progress."

Evli Plc

Evli Plc is a Finnish independent investment service company with a nearly 40-year operating history.

We are currently Finland's leading institutional asset manager with approximately 270 employees.

Our service range covers asset management services and funds, share plan design and administration and incentive programs, Corporate Finance services (mergers and acquisitions), as well as equity research.

- M.Soc.Sc. (Econ.), Helsinki University.
- Mattias has worked in finance since 2012 and in Evli since 2015.
- Before joining Evli, Mattias worked in SEB and Swedbank.

Investment philosophy

Study what has worked

- Value investing has existed for more than 100 years
- Academic consensus is a good starting point

Don't get lost in the factor zoo

- Harness academic, practitioner and in-house research
- Robust empirical evidence as a guideline
- True factors are characteristics that predict returns

Be open-minded

- Financial theories are not always robust
- New data may bring new dimensions
- New ideas may be tomorrow's consensus

The Zoo of Factors

Factors offered outperformance over the long-term

► Illustrative example: value and momentum factors*

Harnessing rewarded factors in equities

We quantitatively analyze and harness certain stock characteristics and select companies for the portfolio which have:

- ✓ **Stability**
- ✓ **Value**
- ✓ **Quality**
- ✓ **Outperformed**

The Evli equity factor approach

Key points in an approach shaped by experience and research

Cast your net wide
Improve the opportunity set

- Factors are captured efficiently with an investable all-cap universe
- A wide universe enables high factor exposure coupled with good diversification

No factor traps
Focus on expected returns

- A high score in one factor is not sufficient as it can be offset by low scores in other factors
- Low average factor scores translate to low expected returns

Strike the right balance
Excess return and active risk

- Balancing potential excess return and deviation from benchmark requires careful cost-benefit analysis
- Pick the low-hanging fruit: portfolio construction decisions that reduce active risk with minimal reductions in expected return

Simple and transparent
Minimize overfitting

- Reduce overfitting by sticking to consensus factor definitions
- Look for simple and transparent solutions wherever possible

Steering clear of factor losers and traps

Low average factor ranks translate to low expected returns

Factor winners:

top 400 stocks based on average factor score

Factor losers:

bottom 400 stocks based on average factor score

Factor traps:

stocks that score above 60% on one factor and below 30% on all others

More than the sum of its parts

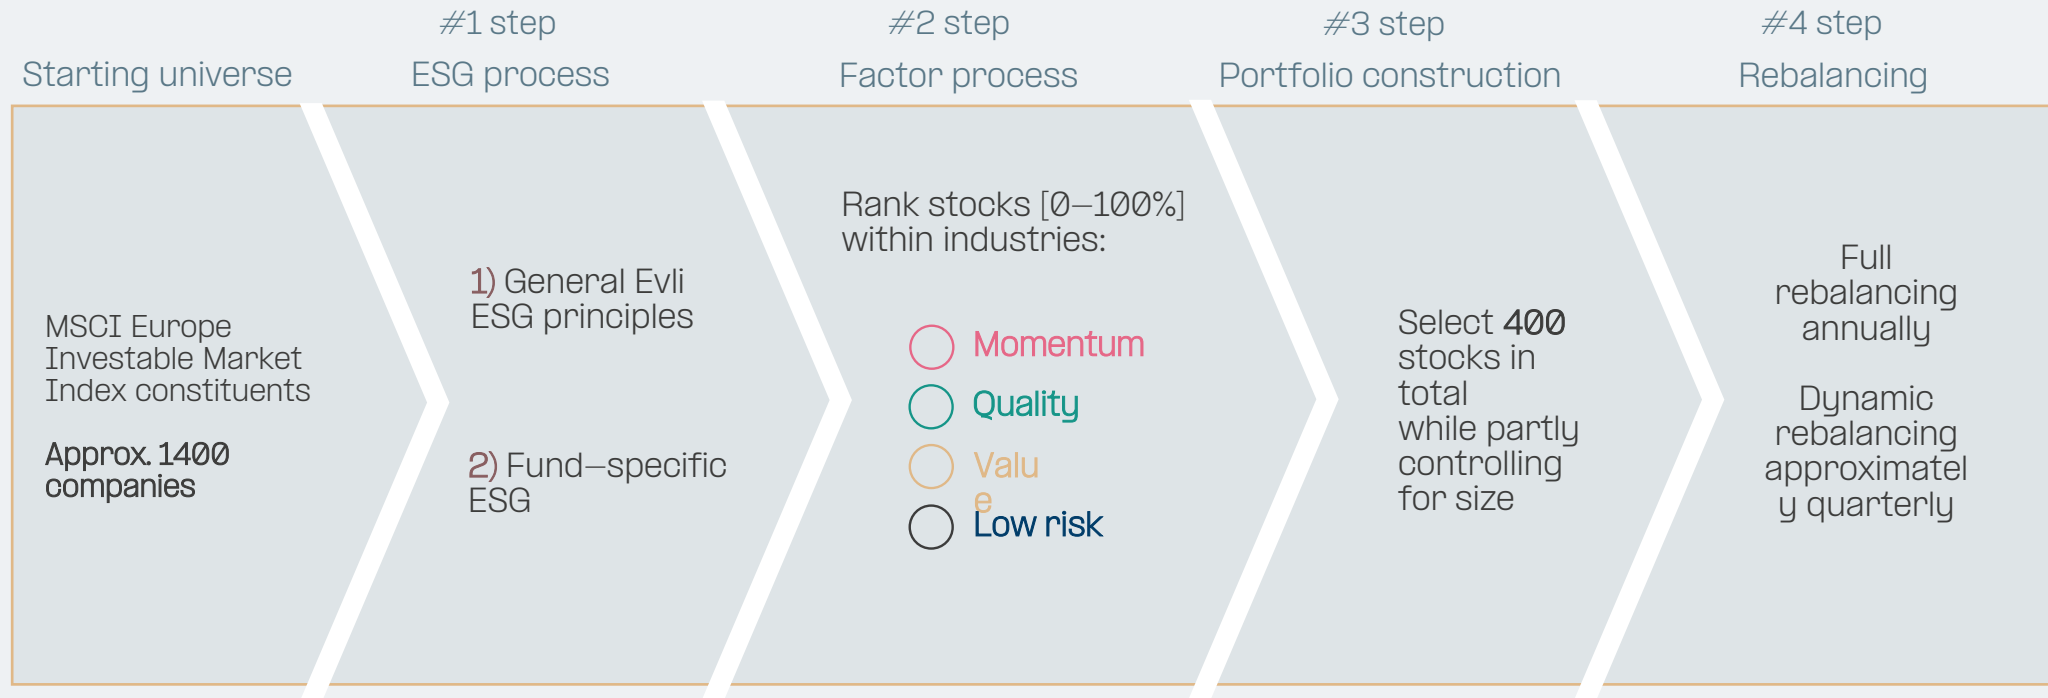

Multifactor approach has added to the outperformance of individual factors

While all individual factors have outperformed the market index, the integrated multifactor approach has performed better than the sum of its parts.

AMBITION

"We want to be the forerunner in responsible wealth management in the Nordics, and in this way help our clients in managing their wealth to support a sustainable future."

Four pillars of responsible investing at Evli

Principles for Responsible Investment

- Decided by Evli's Responsible Investment (RI) Executive Group

ESG¹ –integration in investment process

- Portfolio managers responsible for daily implementation

Engagement and active ownership

- Managed by dedicated RI Team, ESG also part of the discussion at portfolio managers' company meetings

Reporting

- Comprehensive and transparent reporting at fund and client level

#1

in Sustainable investing
according to Finnish institutions
2017–2023²

¹ ESG = Environmental, Social ja Governance

² KANTAR Prospera "External Asset Management Finland" 2023, 2020, 2019, 2018, 2017 and SFR 2022, 2021, 2017

Monitoring, engagement and active ownership

UN Global Compact, the UN Guiding Principles on Business and Human Rights, the OECD Guidelines for Multinational Enterprises and Evli's climate principles compliance are screened quarterly.

All norm violation cases assessed by Responsible Investment team, which decides to start the engagement or to exclude the company.

Main engagement themes are:

- International norm violation
- Mitigating climate change
- Transparent ESG reporting
- Corporate Governance

Active ownership:

- ESG issues are regularly discussed in all meetings with company management
- Evli attends general meetings in Finland, but does not do proxy voting abroad

Collaborative engagement initiatives such as Climate Action 100+, CDP Investor Letters, Nature Action 100 and PRI¹ led collaborative engagements.

Exclusions in practice in all Evli funds

- With 0% revenue threshold:
 - Controversial weapon manufacturers
 - Companies manufacturing peat for energy production
- With 5% revenue threshold:
 - Tobacco producers, adult entertainment producers and companies practicing controversial lending
- With 10% revenue threshold:
 - Thermal coal and oil sands companies
- In addition, some funds exclude:
 - Companies with more than 5% of their revenues coming from gambling, alcohol or weapons manufacturing
 - Companies in extraction and mining of fossil fuels or thermal coal
- International norm violations can also lead to an exclusion; however, this is only a last resort.
- In addition, since March 2022 Russia is excluded as a region where investments can be made. The exclusion covers both Russian companies and the Russian state.

Evli's climate change principles

1. Analysis

- Monitoring the emissions of companies in Evli's funds through fund-specific carbon footprints.
- Funds' carbon footprints are also assessed by Evli's Responsible Investment team.

2. Exclusion

- Avoiding investments in companies that gain a significant part of their revenue (at least 10%) from thermal coal (mining and energy production) and oil sands extraction.
- Also, companies manufacturing peat for energy production are excluded (0%).

3. Engagement

- Encouraging companies to report the climate impacts of their operations, and possible risks vs. benefits.
- Participating in several investor joint engagements and letters, such as Climate Action 100+ , CDP Investors Letters, and Global Investor Statement to Governments on the Climate Crisis.

4. Reporting

- Funds' carbon footprints are reported publicly.
- Evli has published in 2020 first TCFD¹ report of its climate risks.

¹Task Force on Climate-related Financial Disclosure, www.fsb-tcfd.org

Evli's climate targets

Evli aims for carbon neutrality of its own operations by 2025, and carbon neutrality of investments by 2050 at the latest.

The interim target for the investments –50% reduction in indirect emissions from investments by 2030 (compared to 2019).

We are aware that a credible long-term carbon-neutral goal requires systematic work and sufficiently ambitious interim targets to support it.
