INVESTMENT PHILOSOPHY AND PROCESS

Evli Europe

Investment philosophy

- **Cash is King.** Invest in companies with good long-term cash flow characteristics and strong debt coverage
- **See the world as it is.** Focus on what company management has done, not what they say they will do
- **Don't overpay.** In company valuation, use cautious assumptions. It reduces the risk of overpaying for a stock
- **Don't dance where the elephants play.** The fixation among investors with companies' sales, reported earnings, earnings growth, book values and consumer brands makes many companies "crowded trades". Be ready to invest in less well-known or "out-of-favor" companies as well
- **Be disciplined.** Adhering to the chosen investment criteria makes a stock selection process disciplined and repeatable. It gives a fair shot at achieving good long-term returns without the need for perfect timing

Investment strategy

- Focus on European companies that
 - Generate cash flow
 - Have strong debt coverage
 - Are underpriced
- Bottom-up approach
 - No benchmark, sector, geographical or market cap constraints within Europe
- Disciplined and repeatable stock selection based on rigorous investment criteria

Find free cash flow,
and do not overpay.

Find free cash flow and don't overpay

Stock selection

We invest in companies that generate cash flow, have strong debt coverage, and are underpriced

Active

No benchmark, sector or geographical constraints within Europe. Sector and country weights are a result of stock selection. Company positions usually with equal weights

No banks

The valuation methodology we use is not suitable for most banks or insurance companies, hence the fund does not usually invest in them

No currency hedging

The fund does not hedge currency exposures

Multi-cap

We invest in companies of all sizes. Compared to the benchmark index, the portfolio often has a bias towards small and medium size companies

Deviations from index

The fund may deviate substantially from the benchmark index

Workflow

ESG integration

- Focus on companies that generate free cash flow, have strong debt coverage, and are underpriced
- Integration of ESG related cash outflows that are material, probable and quantifiable

FINANCIAL STATEMENT ANALYSIS

Long term free cash flow
Debt coverage
Forensic accounting ratios

Investment Decision

ENVIRONMENT

Restoration, rehabilitation, possible engagement within controversies in water conflicts, toxic releases, environmental impact on communities, packaging waste, electronic waste, carbon emissions...

SOCIAL

Integration of material, probable and quantifiable aspects like litigation, penalties, fines, costs, and possible engagement vis-à-vis controversies in labour management, collective bargaining, discrimination, workforce diversity...

GOVERNANCE

Audit concerns, accounting transparency, consolidation practices, accounting investigations, cross share holdings, corporate structure, variable interest entities, high impact governance events...

ESG examples – Evli Global Equities Team

ENVIRONMENTAL

Researching a mining company, PM became aware of serious environmental violations and handed the company over to RI Team for further analysis. Process led to conduct-based exclusion of company from Evli's investment universe.

SOCIAL

A large retailer faced anti-union concerns and bribery allegations. Situation was assessed by PM, RI Team and Steering group, which led to monitoring and engagement through company meeting. Process had positive outcome and portfolio position was held.

GOVERNANCE

An IT company was found to be a variable interest entity for which ownership structure and shareholder rights to cash flows were unclear. An electrical equipment company had material weakness in internal controls for the past several years. PMs decided not to invest in these companies.

Considerations and risk factors

The fund's investment activities aim to earn a return which, in the long term, exceeds the return of the benchmark index.

As the fund's assets are invested in equities or equity-linked securities, the fund unit value can fluctuate significantly within a short period. The fund's investments carry an exchange rate risk.

The fund's overall risk is also affected by the following risk factors, which the fund's risk profile does not necessarily address fully:

- Liquidity risk: The risk that a financial instrument cannot be bought or sold within the planned time or at the desired price.

Further information on the risks associated with the fund is available in the Key Information Document (KID) and the Fund Prospectus.

If an investor wishes to give feedback about the fund or receive more information, the investor may contact Evli at: Evli Plc, Investor Service, PO Box 1081, FI-00101 or fundinfo@evli.com, or may contact the local distributor of the fund which has sold the fund to the investor. Investors may also send a message via our website: www.evli.com/en/contact-us. Information on how Evli handles client feedback is available at: www.evli.com/en/client-information.

AMBITION

"We want to be the forerunner in responsible wealth management in the Nordics, and in this way help our clients in managing their wealth to support a sustainable future."

Evli is a forerunner in Responsible Investing

Four pillars of responsible investing at Evli

Principles for Responsible Investment

- Decided by Evli's Responsible Investment (RI) Executive Group

ESG¹ –integration in investment process

- Portfolio managers responsible for daily implementation

Engagement and active ownership

- Managed by dedicated RI Team, ESG also part of the discussion at portfolio managers' company meetings

Reporting

- Comprehensive and transparent reporting at fund and client level

#1

in Sustainable investing
according to Finnish institutions
2017–2023²

¹ESG = Environmental, Social ja Governance

²KANTAR Prospera "External Asset Management Finland" 2023, 2020, 2019, 2018, 2017 and SFR 2022, 2021, 2017

Monitoring, engagement and active ownership

UN Global Compact, the UN Guiding Principles on Business and Human Rights, the OECD Guidelines for Multinational Enterprises and Evli's climate principles compliance are screened quarterly.

All norm violation cases assessed by Responsible Investment team, which decides to start the engagement or to exclude the company.

Main engagement themes are:

- International norm violation
- Mitigating climate change
- Transparent ESG reporting
- Corporate Governance

Active ownership:

- ESG issues are regularly discussed in all meetings with company management
- Evli attends general meetings in Finland, but does not do proxy voting abroad

Collaborative engagement initiatives such as Climate Action 100+, CDP Investor Letters, Nature Action 100 and PRI¹ led collaborative engagements.

Exclusions in practice in all Evli funds

- With 0% revenue threshold:
 - Controversial weapon manufacturers
 - Companies manufacturing peat for energy production
- With 5% revenue threshold:
 - Tobacco producers, adult entertainment producers and companies practicing controversial lending
- With 10% revenue threshold:
 - Thermal coal and oil sands companies
- In addition, some funds exclude:
 - Companies with more than 5% of their revenues coming from gambling, alcohol or weapons manufacturing
 - Companies in extraction and mining of fossil fuels or thermal coal
- International norm violations can also lead to an exclusion; however, this is only a last resort.
- In addition, since March 2022 Russia is excluded as a region where investments can be made. The exclusion covers both Russian companies and the Russian state.

Evli's climate change principles

1. Analysis

- Monitoring the emissions of companies in Evli's funds through fund-specific carbon footprints.
- Funds' carbon footprints are also assessed by Evli's Responsible Investment team.

2. Exclusion

- Avoiding investments in companies that gain a significant part of their revenue (at least 10%) from thermal coal (mining and energy production) and oil sands extraction.
- Also, companies manufacturing peat for energy production are excluded (0%).

3. Engagement

- Encouraging companies to report the climate impacts of their operations, and possible risks vs. benefits.
- Participating in several investor joint engagements and letters, such as Climate Action 100+ , CDP Investors Letters, and Global Investor Statement to Governments on the Climate Crisis.

4. Reporting

- Funds' carbon footprints are reported publicly.
- Evli has published in 2020 first TCFD¹ report of its climate risks.

¹Task Force on Climate-related Financial Disclosure, www.fsb-tcfd.org

Evli's climate targets

Evli aims for carbon neutrality of its own operations by 2025, and carbon neutrality of investments by 2050 at the latest.

The interim target for the investments –50% reduction in indirect emissions from investments by 2030 (compared to 2019).

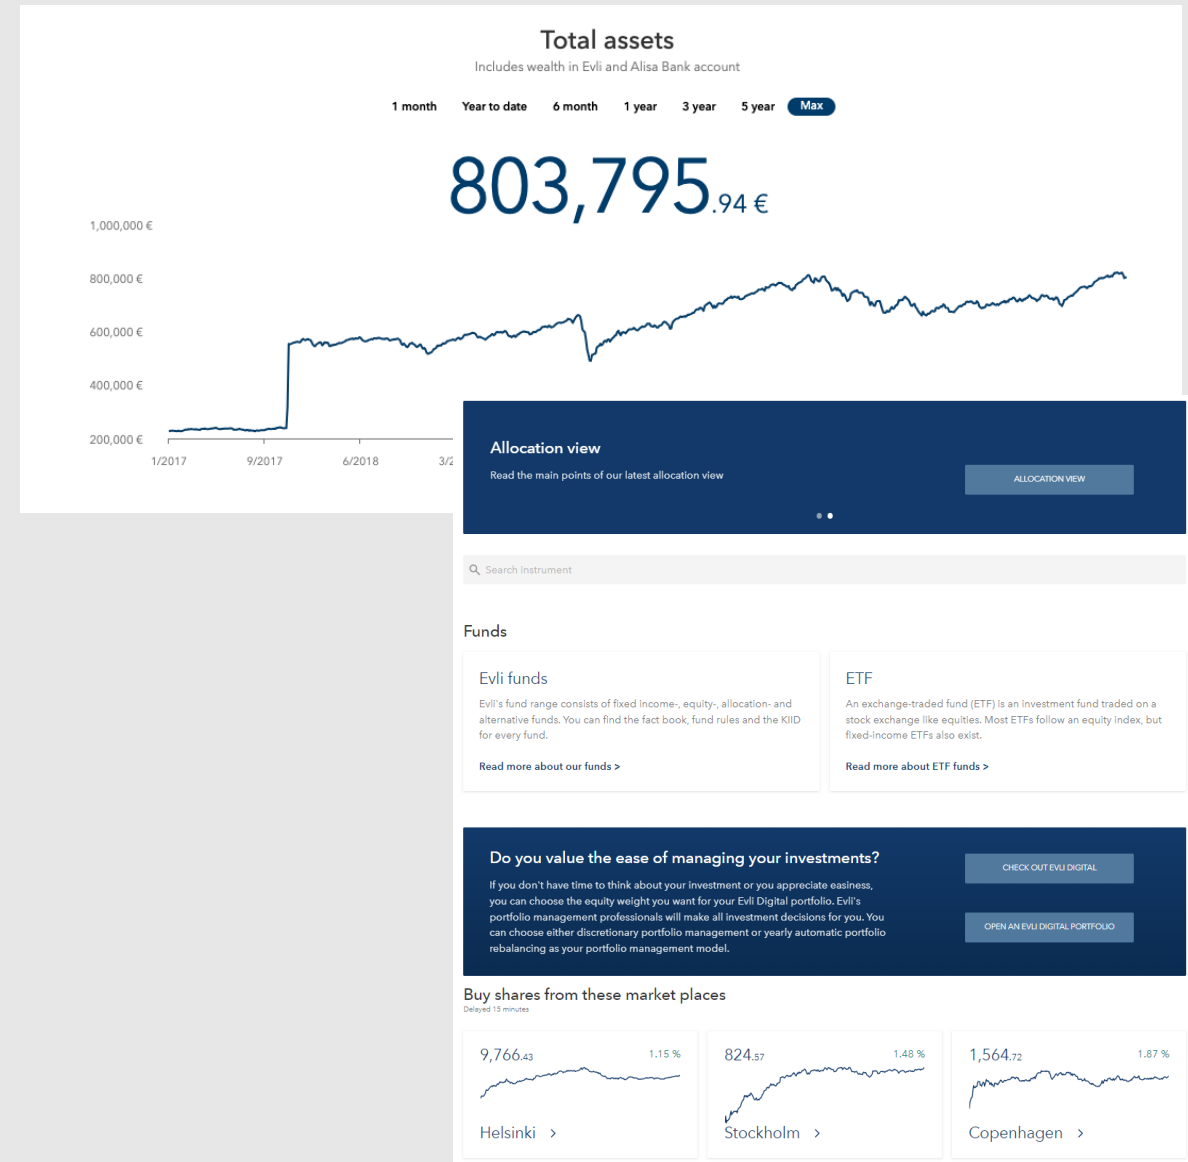

We are aware that a credible long-term carbon-neutral goal requires systematic work and sufficiently ambitious interim targets to support it.
