WHY INVEST IN EVLI GREEN CORPORATE BOND FUND?

Evli Green Corporate Bond

Why Invest in Green Corporate Bonds?

- **Better long-term credit quality**
 - Investments in green and sustainable projects reduce ESG-related risks pertaining to the company's operations and their negative impact on long-term credit quality
- **Advancing corporate sustainability**
 - Establishment of a green bond framework urges companies to critically examine their operations and to ensure they are carried out in a sustainable manner
- **Adapting to changing regulation**
 - The regulatory environment is tightening at ever-faster rate – greening of business operations is a long-term prerequisite for companies
- **Improves the sustainability of the portfolio**
 - Investments in a pure green corporate bond fund improve the sustainability of the portfolio and increase the weight of green corporate bonds in the overall portfolio
- **Same credit risk as conventional corporate bonds combined with an opportunity to promote sustainable development**
 - Sustainability and return are not mutually exclusive – green corporate bonds have the same credit risk as conventional bonds of the same issuer in addition to which they provide clear added value by directly financing companies' green investments

Evli is a forerunner in responsible investing

European Green Corporate Bond Market

Growth of the European IG green corporate bond market,
bonds accepted in MSCI indices

Evli Green Corporate Bond Fund

Pure green bond fund investing in European corporate bonds

- SFDR Article 9 Dark Green fund
- Offers investors an opportunity to be part of the solution and benefit from the green transition

Long-term focus

Companies that are active in the green bond market tend to be more forward-looking than non-green issuers

By investing into green corporate bond market investors gain exposure to the high-quality companies that are investing into sustainable future business

Invests in growing Green Bond market

Global megatrends support the growth of the market and strong growth of investor demand

Focus on strong credits with attractive long-term total return potential

INVESTMENT PHILOSOPHY AND PROCESS

Evli Green Corporate Bond

Evli Green Corporate Bond – Investment Universe

Green bonds

- Green bonds are bond instruments where the proceeds are earmarked to projects or activities with environmental benefits
- **Nearly all or all bonds** in the fund are green bonds

Sustainability bonds

- Sustainability bonds are instruments where the proceeds are earmarked to a combination of projects or activities with **environmental or social benefits**
- Sustainability bond market is still very small but the growing market size adds value for the fund by enabling allocation also to instruments that combine green and social projects

Examples of projects commonly supported by green and sustainability bonds:

Renewable energy

Pollution prevention & control

Clean transportation

Circular economy

SME financing & microfinance

Recent case: Elisa Oyj

✓ Aligned with ICMA GBP

Eligible green projects:

- Energy efficiency
- Renewable energy
- Green buildings and data centers

✓ Contribution to EU environmental objectives

- Climate change mitigation
- Climate change adaptation

✓ Contribution to UN SDGs

Key facts

Sector	Telecommunications
Rating	Baa2/BBB+
ISIN	XS2695011978
Second Party Opinion	Sustainalytics
ESG Rating	AA (MSCI)

Issuer sustainability highlights

- United Nations Global Compact (UNGC) signatory
- No ESG controversies (MSCI & ISS)
- Has set a Science Based Target
 - Committed to net zero by 2040
- Leadership status in CDP Climate Change (Score: A-)
- Sustainability strategy focuses on digital security, digitally inclusive society and customer resource efficiency
 - Annual reporting against targets

Why Invest in Evli Green Corporate Bond Fund?

Pure corporate bond fund

The fund enables investors to invest in green corporate bond market without typical sovereign and agency exposure usually seen in green bond funds.

Rigorous selection process

Each bond is carefully analysed from credit and sustainability perspective to identify bonds that have high credit quality and make positive contribution to environment.

Outstanding fixed income expertise

Evli's fixed income investment strategy is a result of 20 years of consistent long-term work and has proven successful both in bull and bear market.

Impact

Proceeds are allocated to projects that target positive environmental outcomes. An annual impact report provides full transparency to positive impact of the investments.

Investment Philosophy and Strategy

Creditworthiness is the most important factor in selecting investment targets. Credit is about capital protection	<ul style="list-style-type: none">– We assess the TRUE credit quality, NOT relying on official rating– Corporate bonds have limited upside but, in extreme cases, can lose their value entirely
Analysis-based review system of credit issuers	<ul style="list-style-type: none">– Combining fundamental and valuation
Long-term aspect	<ul style="list-style-type: none">– Focus is on stable companies that we own over the issuer's business cycle
Positive environmental and societal impact	<ul style="list-style-type: none">– Investments in corporate bonds that combine strong credit fundamentals with positive environmental and social outcomes

Investment Style

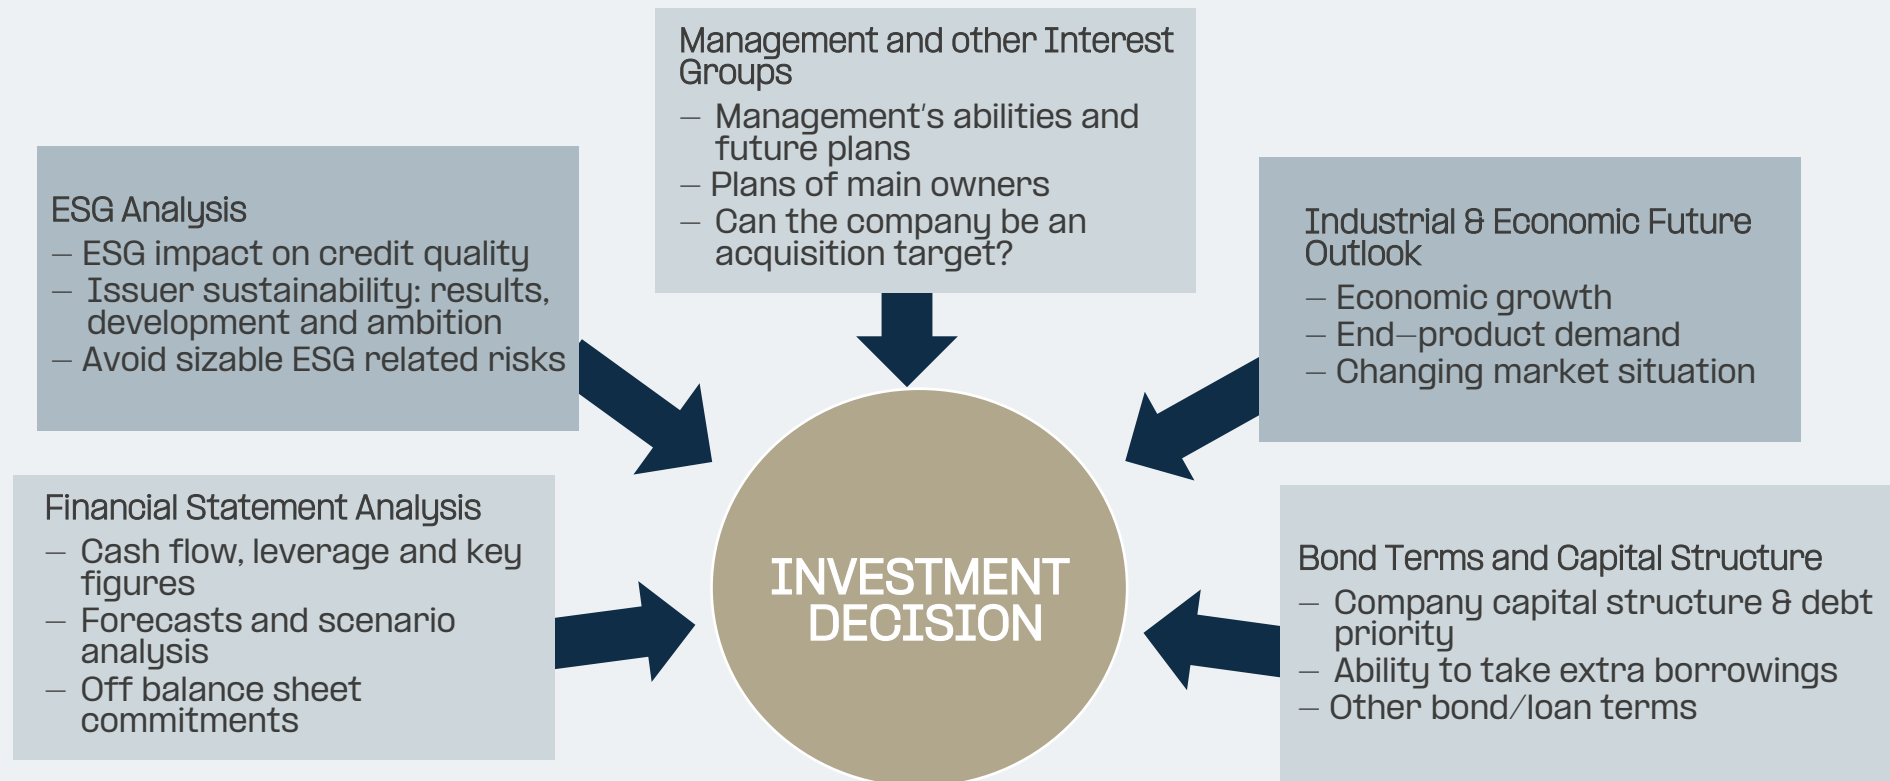

ACTIVE	<ul style="list-style-type: none">– We invest in issuers that we like, regardless of their official credit rating– Active utilization of the movability of corporate bonds between different credit ratings
DISCIPLINED	<ul style="list-style-type: none">– Long-term overall fund risk of the fund is very little changed by adding a portion of HY– Main focus is on issuers' creditworthiness
DYNAMIC	<ul style="list-style-type: none">– Strong and experienced team enables fast decision making– Readiness to invest in companies whose bond pricings have dropped significantly (for example companies whose credit rating is at risk of falling to High Yield)
RISK AWARE	<ul style="list-style-type: none">– Good and manageable diversification– The weight of single investments in the portfolio usually max 5%– Fund's average credit rating at least BBB–

Investment Process

Company analysis

- Main focus on companies that over the cycle:
 - generate consistent positive free cash flow
 - debt leverage decreasing & debt coverage increasing
 - Are priced at an attractive spread compared to their risk

How ESG is taken into account in investment decisions

ESG factors will influence our analysis of the company, industry as well as our thoughts on the management and owners.

Portfolio Managers

- Focus on issues that are quantifiable in terms of credit quality
- For example: Damage to brands, legal risk
- Company meetings are important and we will check availability as well

Investment Decision

ESG team and Executive Group

- Monitoring international principles, ESG scores, CO2 measurement
- Decides which sectors will be excluded
- Decides which companies will be excluded from all funds

ESG examples from Evli's corporate bond funds

ENVIRONMENTAL

Will affect certain sectors more (oil, mining). Examples:

- Invested in the Volvo Car new green bond as the company committed to a new industry leading electric strategy
- Did not participate in Volkswagen Green bond issue due to UN Global Compact fail after the diesel scandal

SOCIAL

Applicable to all sectors. Examples:

- Sold Danske Bank when the first news of the money laundering scandal broke
- Sold Bayer when first verdict in Round-Up case

GOVERNANCE

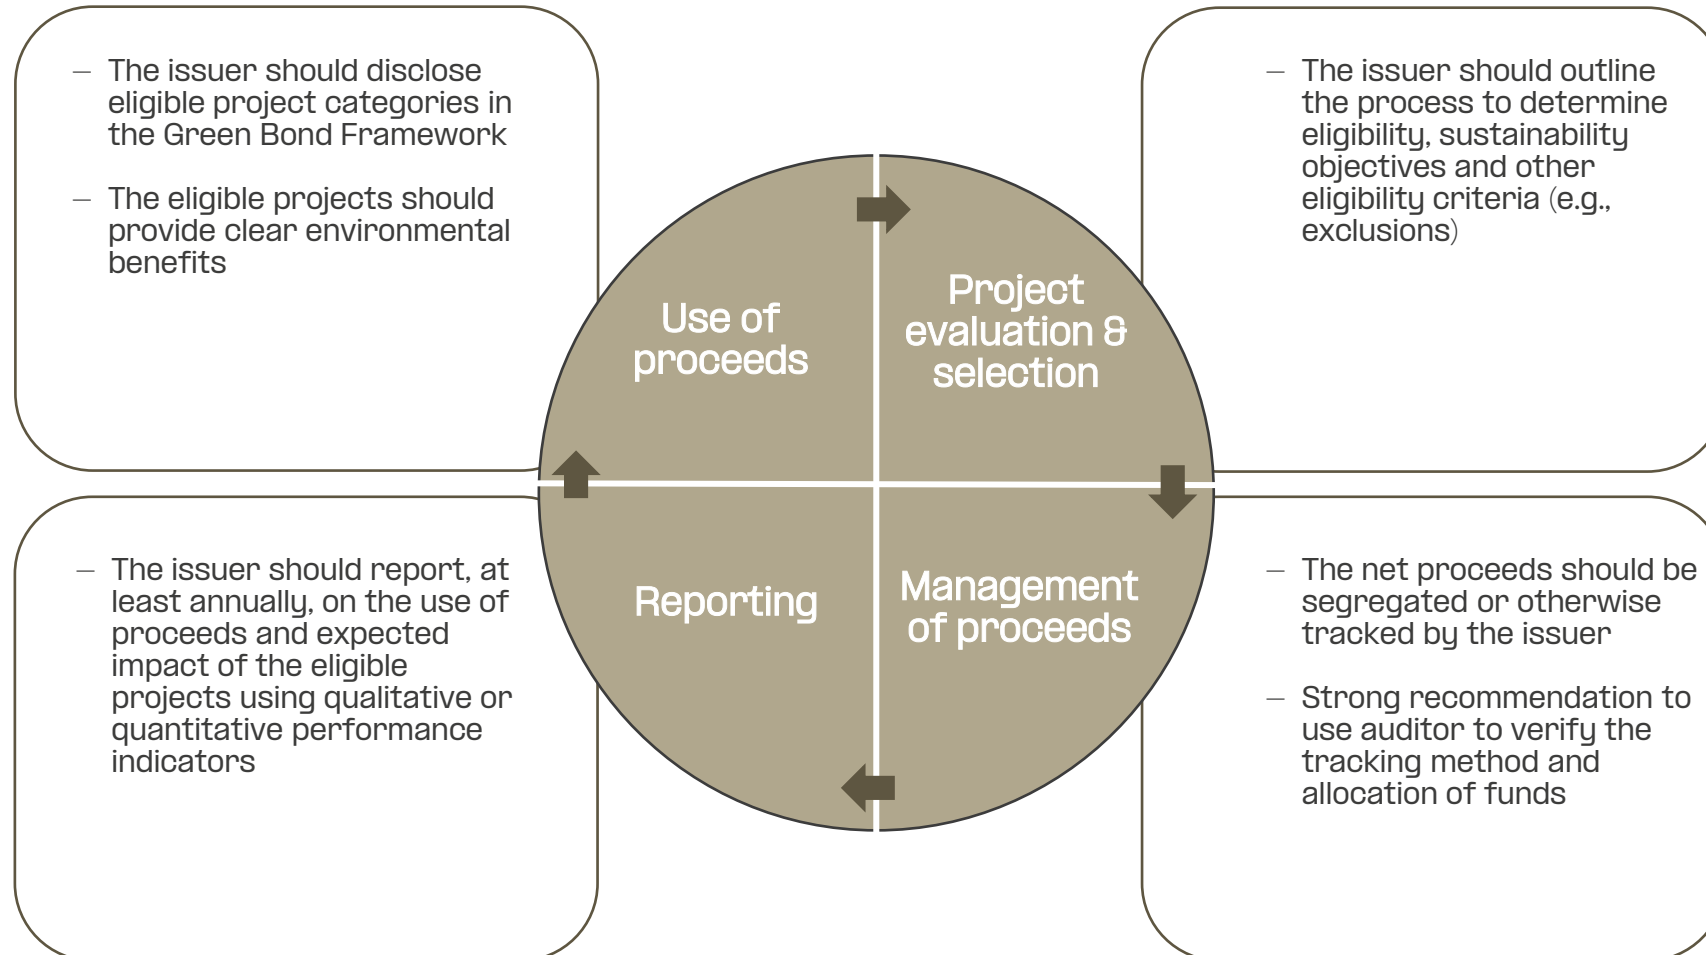

Applicable to all sectors. Examples:

- Did not participate in Wirecard issue in Sept 2019 due to media reports on irregularities, despite an IG rating
- Did not buy Rallye (Groupe Casino) due to issues with up-streaming dividends to parent company

Green Bond Analysis Framework

ICMA principles	– The bonds adhere to the ICMA’s green and sustainability bond principles
Eligible projects	– Projects and activities that have positive environmental impact and contribute to the achievement of UN SDGs
Transparency	– The green bond framework provides a clear description of how the eligible projects are selected, allocation and tracking of proceeds and reporting
Issuer	– Issuer–level ESG analysis to avoid potential greenwashing cases

ICMA's green and sustainability bond principles

Eligible projects

Key considerations:

✓ ICMA principles

The projects should contribute to the high-level environmental objectives defined by the ICMA¹.

✓ Other taxonomies

When applicable, other taxonomies, such as EU Taxonomy or Climate Bonds Taxonomy, may be used to inform the analysis.

✓ Project description

Clear description of green projects (e.g., quantitative or qualitative criteria, intended environmental benefits).

Examples of negative screening cases:

Insufficient exclusions (RBC)	<ul style="list-style-type: none"> The issuer had not explicitly excluded financing of fossil fuel projects
UoP not aligned with EU Taxonomy (AirProducts)	<ul style="list-style-type: none"> Threshold set for lifetime emissions of one of the use of proceeds (blue hydrogen) was not aligned with the EU taxonomy. Also concerns related to lock-in of dirtier technologies
Concerns regarding lack of environmental benefits (Terna)	<ul style="list-style-type: none"> The issuer was not able to demonstrate that eligible projects have meaningful environmental benefits or differ from "business-as-usual"
Relevance to overall sustainability of the issuer (Schiphol)	<ul style="list-style-type: none"> The eligible projects were not deemed material to the overall sustainability of the issuer

Transparency

– In addition to the quality and clarity of project disclosures, we pay attention to:

✓ **Management of proceeds**

A clear description of procedures applicable to allocation and tracking of proceeds.

✓ **Reporting**

The issuer should report on the use of proceeds on an annual basis, preferably with an estimate of the impact achieved.

✓ **External assurance**

The issuer should have obtained a second party opinion or similar third-party verification on the green bond framework. However, our overall analysis is never based solely on an SPO.

Unclear use of proceeds categories (Philips)

- Large share of the proceeds were allocated to various, early-stage R&D projects for which the issuer was not able to provide proper impact indicators or reporting

Issuer

– Our issuer–level analysis has three main components:

✓ **In–house ESG analysis**

Thorough assessment of the issuer’s operations at large to evaluate “green credibility” of the issuer and analysis of the issuer’s sustainability strategy and objectives to ensure the bond corresponds with the broader strategy.

✓ **Exclusions**

Fund–specific exclusion criteria are applied to issuer analysis.

✓ **External ESG analysis**

To complement the in–house analysis, we utilize ESG ratings and analysis provided by external ESG data providers.

– Examples of negative screening cases:

**ESG controversies
(Iberdrola, Stellantis)**

The issuer had been involved in severe ESG controversies (e.g. violations of the principles of the UN Global Compact)

**Green credibility of the issuer
(several issuers)**

The issuer is among the group of the largest providers of fossil fuel financing in the banking industry (RBC)

The issuer’s core business is heavily focused on fossil fuels (e.g., energy production, refining or transportation) (Neste, Teekay Shuttle Tankers, several utilities)

Evli Fixed Income Team: Evli Green Corporate Bond

Juhamatti Pukka, Head of Fixed Income

M.Sc. (Econ.), Helsinki School of Economics. Over 15 years experience in capital markets. Specializing in corporate bond portfolio management. Prior to joining Evli's fixed income team Juhamatti worked as FX/Fixed income dealer at Evli.

More information and the fund's statutory documents (e.g. key investor information document, fund prospectus) are available at <https://www.evli.com/en/products-and-services/mutual-funds>

Considerations and Risk Factors

The fund's investment activities aim to achieve a higher long-term return on assets than the benchmark. The fund's return expectation and risk are higher than for funds that invest solely in government bonds.

The credit risk arising from individual issuers is reduced by diversifying the investments among dozens of different issuers. The average repayment term (duration) of the fund's fixed income investments may be ± 3 years compared to the interest rate risk of the benchmark index.

The fund's overall risk is also affected by the following risk factors, which may not be fully addressed by the fund's risk profile:

- Liquidity risk: The risk that a financial instrument cannot be bought or sold within the planned time or at the desired price.
- Derivatives risk: The use of derivatives to obtain additional returns may increase the fund's risk and return expectation. The use of derivatives for hedging purposes or for risk management may reduce risk and return expectation. The use of derivatives may increase counterparty risk and operational risk.

Further information on the risks associated with the fund is available in the Key Information Document (KID) and the Fund Prospectus.

If an investor wishes to give feedback about the fund or receive more information, the investor may contact Evli at: Evli Plc, Investor Service, PO Box 1081, FI-00101 or fundinfo@evli.com, or may contact the local distributor of the fund which has sold the fund to the investor. Investors may also send a message via our website: www.evli.com/en/contact-us. Information on how Evli handles client feedback is available at: www.evli.com/en/client-information.

AMBITION

"We want to be the forerunner in responsible wealth management in the Nordics, and in this way help our clients in managing their wealth to support a sustainable future."

Four pillars of responsible investing at Evli

Principles for Responsible Investment

- Decided by Evli's Responsible Investment (RI) Executive Group

ESG¹ –integration in investment process

- Portfolio managers responsible for daily implementation

Engagement and active ownership

- Managed by dedicated RI Team, ESG also part of the discussion at portfolio managers' company meetings

Reporting

- Comprehensive and transparent reporting at fund and client level

#1

in Sustainable investing
according to Finnish institutions
2017–2023²

¹ ESG = Environmental, Social ja Governance

² KANTAR Prospera "External Asset Management Finland" 2023, 2020, 2019, 2018, 2017 and SFR 2022, 2021, 2017

Monitoring, engagement and active ownership

UN Global Compact, the UN Guiding Principles on Business and Human Rights, the OECD Guidelines for Multinational Enterprises and Evli's climate principles compliance are screened quarterly.

All norm violation cases assessed by Responsible Investment team, which decides to start the engagement or to exclude the company.

Main engagement themes are:

- International norm violation
- Mitigating climate change
- Transparent ESG reporting
- Corporate Governance

Active ownership:

- ESG issues are regularly discussed in all meetings with company management
- Evli attends general meetings in Finland, but does not do proxy voting abroad

Collaborative engagement initiatives such as Climate Action 100+, CDP Investor Letters, Nature Action 100 and PRI¹ led collaborative engagements.

¹Principles for Responsible Investment is an umbrella organization for responsible investment supported by the UN.

Exclusions in practice in all Evli funds

- With 0% revenue threshold:
 - Controversial weapon manufacturers
 - Companies manufacturing peat for energy production
- With 5% revenue threshold:
 - Tobacco producers, adult entertainment producers and companies practicing controversial lending
- With 10% revenue threshold:
 - Thermal coal and oil sands companies
- In addition, some funds exclude:
 - Companies with more than 5% of their revenues coming from gambling, alcohol or weapons manufacturing
 - Companies in extraction and mining of fossil fuels or thermal coal
- International norm violations can also lead to an exclusion; however, this is only a last resort.
- In addition, since March 2022 Russia is excluded as a region where investments can be made. The exclusion covers both Russian companies and the Russian state.

Evli's climate change principles

1. Analysis

- Monitoring the emissions of companies in Evli's funds through fund-specific carbon footprints.
- Funds' carbon footprints are also assessed by Evli's Responsible Investment team.

2. Exclusion

- Avoiding investments in companies that gain a significant part of their revenue (at least 10%) from thermal coal (mining and energy production) and oil sands extraction.
- Also, companies manufacturing peat for energy production are excluded (0%).

3. Engagement

- Encouraging companies to report the climate impacts of their operations, and possible risks vs. benefits.
- Participating in several investor joint engagements and letters, such as Climate Action 100+ , CDP Investors Letters, and Global Investor Statement to Governments on the Climate Crisis.

4. Reporting

- Funds' carbon footprints are reported publicly.
- Evli has published in 2020 first TCFD¹ report of its climate risks.

¹Task Force on Climate-related Financial Disclosure, www.fsb-tcfid.org

Evli's climate targets

Evli aims for carbon neutrality of its own operations by 2025, and carbon neutrality of investments by 2050 at the latest.

The interim target for the investments –50% reduction in indirect emissions from investments by 2030 (compared to 2019).

We are aware that a credible long-term carbon-neutral goal requires systematic work and sufficiently ambitious interim targets to support it.

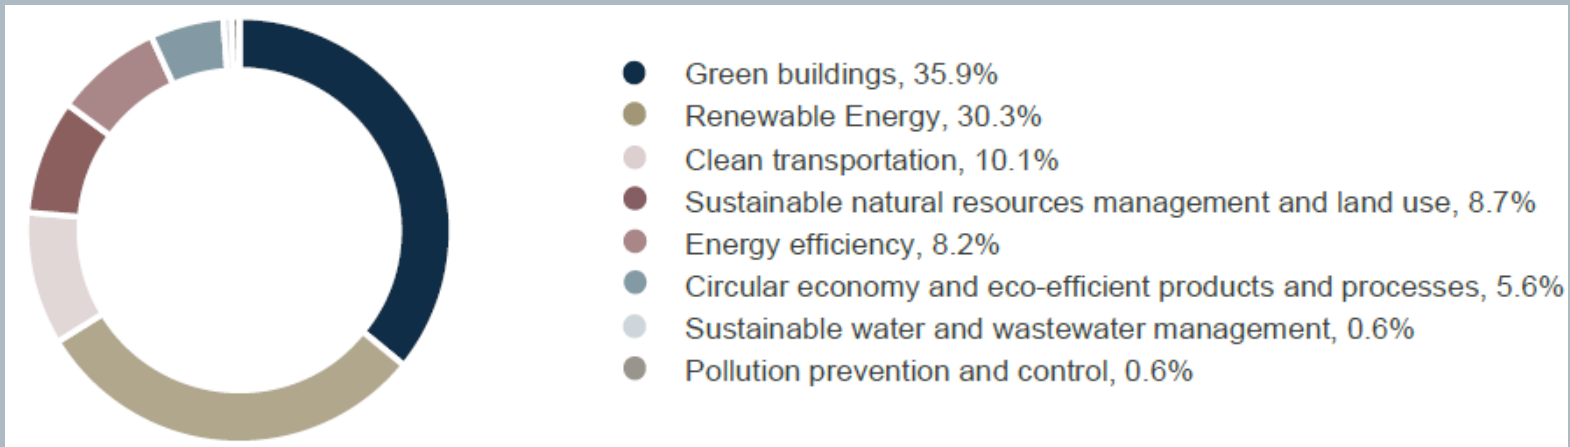

Impact and allocation report

— Annual allocation and impact report provides investors visibility to the use of proceeds, impact generated by the underlying projects and SDG alignment, among others.

Alignment with the UN SDGs

Breakdown by use of proceeds category

Impact and allocation report

79,500

tonnes of CO2 avoided

Equivalent to CO2 emissions from 15,468 homes' electricity use for one year(8)

97,600

MWh/year of renewable energy generated

Equivalent to 11.5 wind turbines running for a year(9)

394,600

m3/year of water saved

Equivalent to 158 olympic size swimming pools(10)

3,200

sqm of green buildings by floor area

1,100

MWh/year of energy savings

6

MW of renewable capacity added

1,050

hectares of certified forest

WHAT OPPORTUNITIES
DOES THE MARKET
CURRENTLY OFFER?

Evli Green Corporate Bond – Overview
of the market

Evli's funds vs. the market

31.7.2024

Market outlook

- Global rate hike cycle is over, Swedish Riksbank and the ECB already delivered first cuts
- Weakening macroeconomic data in the US boosted expectations for Fed rate cuts
- Market pricing for rate cut path continues to be a source of volatility during H2
- The Q2 reporting season was in general on the weaker side compared to market estimates, but broadly neutral from credit investor's perspective
- Credit fundamentals are healthy and refinancing risk is relatively low
- Company outlooks for the H2 turned more cautious, reflecting the expectations of softer economic development
- The corporate bond market offers attractive spreads and yield level
- Rate cuts offer a strong support for total returns as yield curve is expected to move lower
- Currently inverted yield curve is set to normalize when short end of the yield curve shifts down with rate cuts

CENTRAL BANK POLICY IS STILL A SUPERIOR MARKET DRIVER, CLOSE FOCUS ON INCOMING MACROECONOMIC DATA

FOR CREDIT INVESTOR, STRONG CREDIT FUNDAMENTALS AND RELATIVELY LOW REFINANCING RISK OUTWEIGHS ECONOMIC HEADWINDS

THE CORPORATE BOND MARKET OFFERS AN ATTRACTIVE YIELD AND IS SET TO BENEFIT FROM RATE CUTS

HY: Defaults on the rise, expected to plateau this year

Source : Deutsche Bank, Bloomberg Finance LP, S&P, *includes distressed exchanges
See the appendix for the model parameters

- Defaults are at moderate level but up from 2022 abnormally low level
- Due to the healthy credit fundamentals and high balance sheet liquidity, forecasts for Europe are moderate
- 2023 defaults 2.54%, 2024 forecast 3.7% (Deutsche Bank)

AT YOUR SERVICE

Our mission is to increase clients' wealth according to their individual targets.

At your service

- Distinctive and comprehensive reporting
