**WHAT IS THIS PRODUCT?**

---

**Type**

The Fund is a mutual fund compliant with the UCITS Directive that invests primarily in the equities of companies traded on a regulated market or on another regulated market which operates regularly and is recognized, and open to the public that are domiciled in or whose domestic stock exchange is in the United Kingdom (UK), or in other companies domiciled elsewhere whose business is largely dependent on the performance of the UK economy. Such equities are typically traded on another regulated market which operates regularly and is recognized and open to the public in the United Kingdom but they may also be traded on the securities exchanges of other countries. According to the Fund's rules, at least 60% of the Fund's assets must be invested in equities. In normal market conditions, typically more than 90% of the Fund's assets are invested in equities. The Fund may also invest in units of mutual funds and collective investment schemes (up to 10% of the Fund's assets) and in deposits with credit institutions. The Fund does not use derivative contracts in its investment activities. Investment of the Fund's assets is prescribed in more detail in the Fund's rules.

**Investment term**

The fund has no maturity date. The recommended holding period is at least 5 years. In principle, fund units may be subscribed for and redeemed on every Finnish banking day. The Management Company may, at its discretion, decide to dissolve or merge the Fund or its unit series. The Management Company has the right to redeem a unit-holder's units on its own initiative in the exceptional circumstances described in the Fund's rules.

**Objectives**

- The investment objective is to achieve the highest possible long-term value appreciation of the fund unit for the unit holders through active asset management by investing the Fund's assets in accordance with the Fund's rules.
- The benchmark of the fund's return is the FTSE All-Share Index. The Fund is actively managed. The Fund's base currency is the euro. The returns on the Fund's investments will be reinvested.

**Intended retail investor**

The Fund suits private investors who wish to invest in equities in the Fund's limited geographical area (UK). Investors must accept the risk associated with equity market performance and the significant currency risk associated with fluctuations in the exchange rate of the pound sterling (GBP) that is involved in the investment activity. The investor must have a sufficient understanding of the Fund's investments and be prepared to bear the financial risk associated with the investment. The Fund is not suitable as a short-term investment, and the investment horizon should be at least 5 years.

Additional information: The Fund's most recent annual and semi-annual reviews, the most recent fund unit values and additional information on the Fund are available at [www.evli.com/funds](http://www.evli.com/funds) or from the Management Company free of charge, and through a local distributor or service provider in other Member States of the EU/EEA in which the Fund is marketed. Some or all of the information is available in Finnish, English and Swedish. The custodian of the Fund is Skandinaviska Enskilda Banken AB (publ) Helsinki Branch.

## WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

The overall risk indicator expresses the level of risk of this product compared to other products. It indicates how likely the product is to lose money because of market events or because the product developer is unable to pay the investor. On a scale from 1 to 7, the risk category of the product is defined as 5, which is medium-high risk class. Potential future losses are rated at medium-high, and poor market conditions likely to affect. The ability of the management company to pay the investor. Risks that may not be fully captured by the risk indicator are i) liquidity risk, ii) sector risk, iii) counterparty risk, iv) currency risk and v) operational risk. For more information on risks, see the fund prospectus.

**Be aware of currency risk. The currency of this unit series may be different from that of your country. As the investor may receive payments in the currency of this unit series and not that of the investor's country, the final return will depend on the exchange rate between these two currencies. This risk is not considered in the indicator shown above.**

This product is not secured against future market developments, which means that you may lose part or all of the investment.

### Performance Scenarios

The presented figures include all costs related to the product, but do not necessarily include all costs paid by you to an advisor or distributor. The figures do not take into account your personal tax situation, which may also affect the returns you receive.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

The unfavourable scenario occurred for an investment between 4/2015–3/2020.

The moderate scenario occurred for an investment between 3/2017–2/2022.

The favourable scenario occurred for an investment between 9/2019–8/2024.

## WHAT ARE THE COSTS?

Persons who sell or advise on this product to you may charge you for other costs. In this case, the person in question will provide you with information on the relevant costs and will show the impact all costs will have on the investment over time.

## Costs over Time

The tables show the sums used from the investment to cover diverse types of costs. These sums depend on the amount of the investment and how long the product is held. The amounts shown here are illustrations based on an example investment amount and different investment periods. The assumption is that

- In the first year you would get back the amount invested (0 % annual return). For the other holding periods the assumption is that the product performs as shown in the moderate scenario.
- EUR 10,000 is invested

	If you exit after one year	If you exit after the recommended holding period
Total costs	305 EUR	900 EUR
Annual cost impact (*)	1.8 %	1.8 %

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 1.7% before costs and -0.1% after costs.
