WHAT IS THIS PRODUCT?

Type

The Fund is a mutual fund compliant with the UCITS Directive and invests its assets in the equities and equity-linked securities of companies operating in the emerging markets and in the frontier markets of the emerging economies.

Investment term

The fund has no maturity date. The recommended holding period is at least 9 years. In principle, fund units may be subscribed for and redeemed on every Finnish banking day. The Management Company may, at its discretion, decide to dissolve or merge the Fund or its unit series. The Management Company has the right to redeem a unit-holder's units on its own initiative in the exceptional circumstances described in the Fund's rules.

Objectives

- In addition to other characteristics, the fund promotes environmental and social characteristics and requires that target companies observe good governance.
- The fund's geographical investment coverage consists of emerging economies or markets in Asia, Africa, Central Asia, the Middle East and Latin America. The fund may also invest its assets in derivatives contracts both for hedging purposes and within the fund's investment strategy.
- The fund's investment strategy is active and is based on stock selection. Investments are made in consumer-focused companies with growing cash flow and low market valuations. The fund does not have an official benchmark index, and is not subject to restrictions regarding any sector or country within its geographical investment coverage. The fund's base currency is the euro. The returns on the fund's investments will be reinvested.

Intended retail investor

The Fund suits private investors i) investors who wish to benefit from economic growth in the emerging economies, ii) investors who wish to benefit from the world's fastest growing consumer markets, iii) investors who seek high returns and can tolerate the risks associated with the emerging markets, iv) as a part of a diversified investment portfolio due to the high risk level, v) who want to invest responsibly and take into account not only economic analysis but also environmental, social and good governance (ESG) factors. Investors must have a sufficient understanding of the fund's investments and be prepared to bear the potential financial risk associated with the investment. The fund is not suitable as a short-term investment and the investment horizon should be at least 9 years.

Additional information: The Fund's most recent annual and semi-annual reviews, the most recent fund unit values and additional information on the Fund are available at www.evli.com/funds or from the Management Company free of charge, and through a local distributor or service provider in other Member States of the EU/EEA in which the Fund is marketed. Some or all of the information is available in Finnish, English and Swedish. The custodian of the Fund is Skandinaviska Enskilda Banken AB (publ) Helsinki Branch.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

The overall risk indicator expresses the level of risk of this product compared to other products. It indicates how likely the product is to lose money because of market events or because the product developer is unable to pay the investor. On a scale from 1 to 7, the risk category of the product is defined as 4, which is medium risk class. Potential future losses are rated at medium, and poor market conditions may affect the ability of the management company to pay the investor. The risks that the risk indicator may not necessarily fully take into account are i) liquidity risk, ii) event risk, iii) sovereign risk, iv) operational risks, v) counterparty risk, and vi) derivatives risk. For more information on risks, see the fund prospectus.

Be aware of currency risk. The currency of this unit series may be different from that of your country. As the investor may receive payments in the currency of this unit series and not that of the investor's country, the final return will depend on the exchange rate between these two currencies. This risk is not considered in the indicator shown above.

This product is not secured against future market developments, which means that you may lose part or all of the investment.

Performance Scenarios

The presented figures include all costs related to the product, but do not necessarily include all costs paid by you to an advisor or distributor. The figures do not take into account your personal tax situation, which may also affect the returns you receive.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 14 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

The unfavourable scenario occurred for an investment between 12/2021–12/2022.

The moderate scenario occurred for an investment between 12/2011–11/2020.

The favourable scenario occurred for an investment between 3/2009–2/2018.

WHAT HAPPENS IF EVLI FUND MANAGEMENT COMPANY LTD IS UNABLE TO PAY OUT?

The insolvency of the Management Company will not necessarily cause losses to you. The assets of the Fund and of the Fund Management Company are held separately. The custodian of the Fund's assets is Skandinaviska Enskilda Banken AB (publ) Helsinki Branch. The investment is not covered by any investor compensation or guarantee scheme.

WHAT ARE THE COSTS?

Persons who sell or advise on this product to you may charge you for other costs. In this case, the person in question will provide you with information on the relevant costs and will show the impact all costs will have on the investment over time.

Costs over Time

The tables show the sums used from the investment to cover diverse types of costs. These sums depend on the amount of the investment and how long the product is held. The amounts shown here are illustrations based on an example investment amount and different investment periods. The assumption is that

- In the first year you would get back the amount invested (0 % annual return). For the other holding periods the assumption is that the product performs as shown in the moderate scenario.
- EUR 10,000 is invested

	If you exit after one year	If you exit after the recommended holding period
Total costs	449 EUR	3 751 EUR
Annual cost impact (*)	2.9 %	3.2 %

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 11.5% before costs and 8.3% after costs.

HOW LONG SHOULD I HOLD IT AND CAN I TAKE MONEY OUT EARLY?

Recommended holding period is at least 9 years.

The recommended holding period is based on the fund's risk-reward profile. Fund units may be redeemed on every Finnish banking day excluding those banking days on which the net asset value of the Fund or its investments cannot be determined due to foreign public or bank holidays or if the Management Company has temporarily suspended the calculation of the value of the fund units due to exceptional conditions described in the Fund rules. A list of days on which the trading of fund units is not possible is available from the Management Company and on the Management Company's website.
